

# Company Profile

---

Our Mission is to “Improve the health and sleep of the world’s consumers through our products and services.” We consider it essential to “make tomorrow better” through bedding. “MuAtsu,” a pioneer of ergonomic mattresses, is our flagship product. The mattress has sold more than 4.3 million units and has been supporting everyone’s health for a long time. Over recent years, we have been developing bedding products such as “100 Years Down” and “50 Years Mouton” to achieve a sustainable society by using them for a long time with maintenance.
